

## Altiras Offers a Comprehensive Solution for Slop Oil

### Comprehensive Solutions

Altiras provides everything necessary to complete the job including engineering, equipment, procedures, personnel, and logistics.

### Low/No Risk

Altiras offers to solve problems and bears the risk of any costs necessary to make the project happen.

### Best Economics

Altiras is happy to bid on projects.

### Sustainable

Altiras solutions avoid disposal and return products to their intended use.

## THE PROBLEM

Refineries are facilities that process raw petroleum into useful products such as gasoline, diesel, and other fuels. When these refineries have to shut down, they often need to clear out any excess materials they have on hand. To do this, they may place multiple products into the same tank, which can result in a mixture of products that is difficult to sell or use.

In this case, a company called Altiras bought 35,000 barrels of what is described as an “ugly, off-spec product” from a shutdown refinery. This product was high in organic chlorides, which can cause problems in refining or processing. Additionally, the product was not suitable for truck loading, meaning it could not be transported in this way, and there was no equipment on site to process it.

This presents a challenge for Altiras, as they now have a product that is difficult to sell and use. They will need to find a way to dispose of it, process it further, or find a buyer who is willing to take it despite its limitations.

## THE ALTIRAS SOLUTION

Altiras provides a unique and environmentally-friendly solution for companies that have waste materials, including refineries. The company pays the customer to recycle their waste materials, making it a mutually beneficial arrangement.

In addition to paying the customer for their waste materials, Altiras also cleans the site to ensure that it is left in a safe and environmentally-friendly condition. This helps the customer avoid any potential liability or environmental concerns that may arise from the presence of waste materials on their site.

Altiras also covers all transportation costs and processing expenses associated with the waste materials, further reducing the customer's costs and responsibilities. The company has experience working with multiple different refineries and their combined products, and is equipped to handle the unique requirements of each customer.

In conclusion, Altiras offers a comprehensive solution for companies with waste materials, providing a turnkey service that covers all aspects of the process. The company helps the customer to safely and efficiently manage their waste materials, while also providing a financial benefit.

## **RESULTS**

Altiras is a waste management and recycling company that provides a comprehensive solution for customers who want to recycle their waste materials. The company pays the customer to recycle their waste, taking care of all transportation costs and processing. This means that the customer doesn't have to bear any expenses related to the transportation and processing of their waste materials.

Altiras has extensive experience in helping multiple different refineries manage their combined products. The company offers a solution that enables these companies to get rid of their waste products without having to bear the costs of transportation and processing.

In addition to paying the customer for their waste, Altiras also provides site cleaning services. This means that the company takes care of cleaning the customer's site after the waste has been collected and transported, ensuring that the site is left in a clean and safe condition.

Overall, Altiras offers a comprehensive and cost-effective solution for customers who want to recycle their waste materials. The company's approach is designed to make the recycling process as hassle-free as possible, taking care of all aspects of the process from transportation to site cleaning. If you're looking for a solution to manage your waste, Altiras can help.
